

STUD WELDING PRODUCTS, INC.

STUD WELDING UNIT

Model: CDi 1502 Auto

Inverter-Capacitor Charging Technology

- Maximum welding rates
- Minimum weight
- Minimum energy consumption
- Maximum efficiency

DESCRIPTION

The ideal entry-level machine for automatic stud welding with tip ignition.

Saves you money, time and energy!

FEATURES

Effective cost savings

- Market-friendly development concept and innovative inverter technology mean an over 30% lower selling price (compared to previous model).

Immense time saving

- Combined with the fully-automatic stud feeder VBZ-3, up to three times faster than manual operation

Minimum energy consumption

- CDi 1502 consumes 30% less electrical power through inverter-capacitor charging technology

Maximum welding rates

- 100% higher welding rate through inverter-capacitor charging technology
- Fastest welding rate in its class

Minimum weight

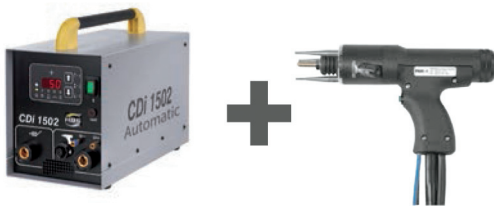

- 20% weight saving compared to previous model

Easy handling

- Optimal customer benefit through a customer-oriented development
- Switch on machine. Select stud diameter/charging voltage and blowing time. And off you go!

Outstanding performance

- Highest charging energy in its class: 1,600 Ws / 66,000 μ F / 220 V charging voltage
- 20% charging redundancy based on 220 V charging voltage
- Especially developed capacitors for stud welding

Automatic stud welding machine CDi 1502 & automatic stud welding gun PAH-1 (Manual stud feeding into the side of the gun)

- UP TO 50% FASTER compared to manual operation!

Automatic stud welding machine CDi 1502, automatic stud welding gun PAH-1 & fully automatic stud feeder VBZ-3

- UP TO 200% FASTER compared to manual operation!
