

RAPID FERRULE TOOL

“Decrease Fatigue, Increase Efficiency and Reduce Installation Cost of Stud Welding”

Work Safer, Smarter, and Faster!

DESCRIPTION

The Rapid Ferrule Tool is a patented ergonomically-designed tool to feed and dispense ferrules on metal deck, steel beams, bridge girders various other applications. The ferrule dispensing tool also comes with a deck punch tool to assist in draining water from metal decking. A ferrule breaking tool is also included. These tools are designed to allow the operator to work in the upright standing position, rather than bent over.

FEATURES

- Rapid Ferrule Tool dispensed ferrules at least 4x faster than laying out ferrules by hand.
- Allows operator to work in the standing position and can visually observe that the ferrules are evenly spaced through the entire length of the beam
- Ability to dispense ferrules up to four feet away from the body, keeping your employee away from the perimeter of the building
- Some states have legislated ergonomic laws in which companies must provide the most ergonomically beneficial tools for the workplace.
- The “metal deck” punch tool and the “ferrule breaker” tool are tow additional tools designed to keep the operator int he upright position.

COST SAVING
COST SAVING

Conventional Layout-Hand 1,500 Ferrules	Using Rapid Ferrule Tool 1,500 Ferrules
4hrs x \$60/hr = \$240.00 or .16/Per Ferrule	1hr x \$60/hr = \$60.00 or .04/Per Ferrule
SAVING OF .12/ EACH FERRULE
